

SWISS WHITE MASK

Lightening Treatment
For skin with pigmentation defects

Directions for use

PREPARATION PHASE

TREATMENT PHASE

1. Apply a few drops of **EYE CONTOUR SERUM**. Then apply the **SKIN RENEWING SERUM** on the neck and face (except under the eyes and on the eyelids). Massage until completely absorbed.
The fruit acid and glycolic acid in the SKIN RENEWING SERUM prepare the skin to receive the active ingredients of the mask.
2. Protect the eyes with cotton wool pads moistened with warm water or Gentle Toner.
3. Apply the **SWISS WHITE MASK** on the face. Use a brush to eliminate air bubbles under the mask.
4. Leave the mask to work for **25 minutes**.
5. Remove the mask by rolling it off, starting from the forehead.
6. Complete the treatment by applying the **CLARIFYING CREAM** with a light massage blending into the remaining serum from the mask

FOR CLIENT'S HOME USE

CLARIFYING CREAM every day, morning and night.

SKIN RENEWING SERUM at night under the cream. By stimulating the natural process of cell renewal, the complexion becomes more uniform and wrinkles are evened out.

SUN BLOCK when sunny. Moisturising and protects the skin from UV rays.
